ARCHITECTURAL DESCRIPTION:

The residence at 116 Elm Street was built c. 1900, a cottage, ~~in the Colonial Revival style~~. This 3x4 bay, wood frame, 1-1/2 story building sits on a rock-faced cement block foundation. The building is clad with wood clapboards. The front gable roof is covered with wood shingles. A brick chimney is located in the center at the ridge. The sidehall entrance contains an early 20th century wood door with a large square glass pane in the upper section. The door is flanked by half sidelights and protected with a door hood supported by scroll brackets. The windows contain 12/12 wood sash with flat surrounds. A dormer projects from the east roof slope. The rear ell contains a secondary entrance. A single stall, front gable garage is located next to the house.

HISTORICAL NARRATIVE:

The building is typical of many cottages in Kingston built around the turn of the century (1900). It combines many details from earlier building styles (door hood, sidelights, 12/12 sash). This part of Elm Street contains a mix of 19th and 20th century buildings and has an excellent representation of each.
