ARCHITECTURAL DESCRIPTION  *see continuation sheet*

*Describe architectural features. Evaluate the characteristics of this building in terms of other buildings within the community.*

St. Joseph Parish is located at 266 Main Street and was built in 2001 in the cape style with a side gable roof. This 3 x 4 bay, wood frame, one-and-a-half story building is rectangular in plan and sits on a concrete foundation. The building is clad with vinyl siding. The side gable roof is covered with asphalt shingles. A shed dormer pierces the roof across the front slope. The center entrance contains a wood panel door flanked by full sidelights door with a plain surround. A door hood protects the entry. The windows contain 6/6 vinyl sash with flat surrounds. The cornerboards are thin and flat. The cornice is thin with a shallow molding. A ell containing a garage is attached to the side of the building.

HISTORICAL NARRATIVE  *see continuation sheet*

*Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.*

A building previously stood on this site but was demolished in 1997. A building which previously served as the Parish house stood adjacent to this site. The previous Parish house was moved during the construction phase of this new building (see photos). This Parish House was built by St. Joseph Parish in 2001.
