REPORT OF THE SELECTMEN

The steady growth of the Town, which has prevailed during recent years, has continued during 1956, placing increased burdens on all departments.

The stated value on building permits for new construction during the year amounted to \$419,057.00.

We have been notified by the Massachusetts Department of Public Works that the reconstruction of the Railroad overpass bridge on Pembroke Street will be made part of the Department's 1957 program. Correction of this serious traffic hazard will eliminate at least one of our present problems.

Under the Chapter 90 road construction program Wapping Road was rebuilt as far as West Street. It is proposed to complete the reconstruction of this road in 1957. Also, the Massachusetts Department of Public Works and the Plymouth County Commissioners have agreed to join with the town in reconstructing a portion of Lake Street near the Silver Lake Regional School.

Although Grove Street was laid out by the County in 1848 none of the original bounds are in existence, therefore it became expedient to call on the good offices of the County Commissioners to make a new lay-out, which they graciously agreed to do.

The other half of the Town House roof was reshingled. Also, the need of new paint is apparent both on the inside and outside of this building.

Group Life and Health Insurance for Town employees which was overwhelmingly endorsed by the voters on March 10, 1956, was placed in operation on August 10, 1956.

As of July 1st, an increase in the mandatory State budget for charity recipients, plus additions to the roles in certain categories, so depleted the funds available to these departments that it became necessary in October to call a Special Town Meeting to vote additional funds for the balance of the year.

The combination Police Cruiser-Ambulance which was purchased this year has proven so exceptionally satisfactory that we highly recommend to the voters that a companion vehicle be purchased to replace the 1935 cruiser.

On March 27, 1956, Philip S. Cronin of 273 Main Street, a life long resident of Kingston, was appointed by the Selectmen as Town Counsel.

We wish to express our sincere thanks to all Town Officers and Committees for their co-operation during the past year.

In the interest of economy several departmental reports are not included in this issue. The following annual reports have been received and approved by the Selectmen and are on file in the Town House: Alewife Committee, Harbor Master, Industrial Development Commission, Inspector of Animals and Slaughtering, Playground Commission, Plymouth County Extension Service, Sealer of Weights and Measures, Town Forest Committee, Veterans' Services, and Waterfront Committee.

REPORT OF THE PLANNING BOARD.

In this the second year of planning board operation in Kingston there has been a definite decrease in the number of subdivisions requiring consideration. This has undoubtedly been due in part to the increased difficulty and expense experienced in financing building and probably also in part to the fact that real estate development in Kingston now must meet the standards imposed by zoning and planning board regulation.

During the time that the zoning and subdivision ordinances have been in effect it has become increasingly apparent that the present arrangements for administering these regulations are not entirely satisfactory. For example, in the control of real estate subdivisions not only the Planning Board, but the Selectmen, Board of Health, Highway and Water Departments are normally involved and frequently the Zoning Appeal Board and Industrial Development Committee should also be consulted. Some means of assuring that all interested agencies are systematically informed must be developed to assure the fair and efficient disposition of zoning and planning problems. The increasing complexity of the town's affairs has already led many of the town's officers to feel that some revision in the organization of the municipal government might be necessary and it is to be hoped that if such a revision is undertaken that this problem will receive particular attention.

Last year the Planning Board was directed to undertake a study of the parking facilities available and the measures necessary to expand them. A considerable amount of time has been expended on this problem with particular reference to the central shopping area where conditions seem least satisfactory. While a plan was evolved which in general terms would seem satisfactory it has not been possible to produce a definite proposition that could be presented with the Board's endorsement for consideration by the town.

It seems proper that the Planning Board should call the attention of the town to the fact that in the current year \$68,000 must be appropriated for repayment on the principal of the

town's bonded debt. This figure will not be materially reduced until 1964 when the final payment will be made on the Elementary School. In addition there must be in the coming year an additional appropriation of \$19,000 to cover interest on the debt. While the amount required for interest will of course decrease as the debt is reduced by annual payments it is nevertheless apparent that the town has assumed a substantial burden of fixed charges for some years to come.

REPORT OF THE POLICE DEPARTMENT

You will note several things of importance in this report. There were 12 fewer accidents in 1956 than in the previous year, where personal injury and property damage were concerned, and there were no pedestrian or fatal accidents. This is always good news to any town. As a result of this we have been awarded another Certificate of Achievement by the Governor's Highway Safety Conference for recognition of outstanding highway accident prevention activities. Kingston has just completed its third consecutive year without a fatal accident.

Violations and offenses involving motor vehicles constituted the greatest number of arrests by our department in 1956, with crimes of drunkenness running second.

Juvenile offenses in Kingston were just half of what they were in 1955, which is most encouraging. Several instances concerning juveniles were satisfactorily handled by the police with the co-operation of the parents and the injured parties, and no court action resulted. In my opinion this is the best way to handle cases of this type, if at all possible. Little League Baseball, Basketball and any other organized type of activities where youngsters can learn sportsmanship and fair play is always an asset to any community and will aid in the suppression of juvenile delinquency.

In my budget requests for 1957, funds have been requested to enable me to send one officer to the State Police School at Framingham in April for this very essential and intensive course on modern police techniques and procedures. I feel that this instruction and training is most beneficial to the officer who, in turn, will use that knowledge and experience to add to the efficiency of the department.

I would like to thank the Honorable Board of Selectmen for their interest in this department, and for their co-operation during the year.

Respectfully submitted,

JAMES R. GOONAN,
Chief of Police

REPORT OF THE MOTH SUPERINTENDENT

In accordance with the requirements of the Department of Natural Resources, several acres of land were sprayed in the trap areas where more than seven moths had been caught. This year out of thirty traps set, only two moths were found, which in itself is an excellent indication of the benefits derived from spraying.

The major problem of the Japanese Beetle still exists. Work has been continual in an effort to alleviate this condition. Certain areas of the town are more heavily infested with the beetle than others. If this should be the case in your area, it will be appreciated if this department is notified, so that the proper spraying application can be made. The same applies to Poison Ivy which is always a nuisance.

It is satisfactory to report that the sprayer made by this department for the control of poison ivy has proven beneficial.

EARL C. PAULDING,
Superintendent of Moths.

REPORT OF THE TREE WARDEN

The major problem which has confronted this department, are the Elm trees growing on private properties and particularly those in the swamp areas, which cannot be sprayed with the equipment we now have. It is the intention of this department to do some of the dormant spray by helicopter, in an effort to combat the Elm disease. To emphasize the seriousness of the foregoing, twenty-five samples of Elm trees were taken this year and forwarded to the State Laboratory for analysis. Of this number, twenty were found to have Dutch Elm disease. Some of these trees have already been removed and burned. Those remaining will be destroyed before next Spring. The assistance of the townspeople is requested by the repeated warning that "no Elm wood is to be stored" for fire wood or other purposes.

A number of various species of trees were planted along the roadsides, which program will continue during 1957. All of the streets have had brush cutting and work at present consists of removal and trimming of overhanging limbs.

EARL C. PAULDING,
Tree Warden.

REPORT OF THE FIRE ENGINEERS

The activities of the Fire Department during the year included the following: 8 house fires, 3 chimney fires, 10 car fires, 1 tractor fire, 1 house-trailer fire, 1 refrigerator fire (motor), 6 calls for faulty oil burners, 2 calls to wash gasoline from the street, 10 calls for oxygen, and 10 ambulance calls.

The fire loss report totaled \$4,375.00, which figure includes damage to buildings and contents. These buildings carried a taxable evaluation of \$69,500.00 not including contents. A large part of the fire loss total can be attributed to one house-trailer fire, resulting in a \$3,600.00 loss.

The members of the Company, as usual, were faithful in attending regular meetings and practice sessions. Our thanks are extended to the officers and men of the Company for their support and co-operation shown in their work.

REPORT OF THE FOREST FIRES WARDEN

Three major factors contributing to the fine record of this department were namely: the prompt reporting by the State Observation Towers at Manomet and Monks Hill; the excellent co-operation and fine spirit of our call firemen combined with the experienced services of our permanent men; the beneficial use of the two-way radios. Due to the foregoing our largest fire was one which was kept to an acre and a half.

A total number of 104 calls were answered during the year.

The importance of obtaining permits for open air fires is again stressed, as it enables the department to know the exact location of these fires when reported by the fire towers.

Respectfully submitted,

G. PALMER HOLMES,
Forest Warden

REPORT OF THE DIRECTOR OF CIVIL DEFENSE

To the Selectmen:

The foremost points of concern in Civil Defense in Kingston are:

Evacuation - "Where the bomb isn't is the safest place to be," when a bomb is dropped. We expect about 2 hours of warning time, and must use that time to get as many people as possible to safer places. Many cities and towns are to be evacuated (as much as possible), others are to receive and care for the evacuees. Kingston is a reception town. To do our duty fully and quickly we need several hundred persons enrolled in various "services." At once we need: better radio communication, a disaster "control center," a message center, and trained radiac teams.

Communications - Our present RACES (radio) equipment must be expanded at once with more licensed operators and mobile two-way sets. Our present sets keep contact with higher C. D. headquarters, and give us some local contact (about 10% of our needs).

Control Center - To coordinate all of the services involved in receiving, caring for, and returning many thousands of evacuees. Police, housing, supply of food, fuel and clothing, medical and nursing care, rescue and engineering, and welfare services are a few of the services needed. Fire services are on a state-wide plan. Many hundred Kingston volunteers are needed for these services, and all will need training.

Message Center - A most important unit to keep the "staff" abreast of the developments in any emergency situation. It also keeps full records of all actions taken. These records form the basis of settlement of claims which may be made, after the emergency is over.

Watch Tower - Ground Observer Corps is still a vital part of the warning system. Our warning will come from stations many miles to the east and north. Our tower is for warning to a tremendous population many miles to our west, to give them a chance to evacuate their cities. We have enough personnel for 2

1 or 2 days of 24-hr. watching in an emergency. Many more are needed for full coverage for a weekly schedule.

Radio—Harmful products of atomic or hydrogen explosion, which reach us through "fallout" are carried on minute particles of dust or moisture, traveling distances by the great-velocity upper air winds. One Kingston resident has taken the Federal-State Radio course and is ready to instruct others in basic principles for detection and decontamination, as soon as equipment is available.

Respectfully submitted,

CHARLES W. LAWRANCE,

Director, Civil Defense

REPORT OF THE BOARD OF HEALTH

Of prime importance to your Board of Health in 1956 was the handling of the Poliomyelitis program. Eleven clinics were held, beginning on March 4th and continuing through December 11, 1956. A total number of 1,757 inoculations were administered during this period.

In contrast to the 14 cases reported in 1955, Kingston had no cases reported in 1956.

The splendid team work of Doctors Gould, Mayo and Briggs, together with the assistance of Mrs. Helen L. Peterson, Mrs. Dorothy L. Felt and Mrs. Irma A. Ruffini, was the greatest factor in the success of this program.

Kingston was asked to send a representative from our school to help spell the name Salk in honor of the discoverer of the vaccine which bears his name. Our representative was Miss Ruthann Bailey, who appears on the right in the above picture along with representatives from other towns.

The mosquito program of ditch cleaning and spraying was carried through with remarkable success. Weather condition is always the controlling factor in this work. The last aerial spray was timed to alleviate as far as possible the threat caused by the summer outbreaks of Equine Encephalitis in this area. Kingston was very fortunate in that it had no case of this disease.

Your Board sponsored on November 19th an X-ray Clinic instigated by the Plymouth County Health Association. Four hundred and six people were x-rayed on that day. The press, the local radio stations, and our school nurses assisted very materially in this work.

The dental care of the school children was carried on as usual. This work was in charge of Dr. Thomas D. Gorham, school dentist. Your Board of Health plays a part in this work by furnishing the equipment and the supplies. Your Board also pays for the initial examination of the children at the beginning of each school year. The actual cost of the work done must be borne by the parents of the children treated.

In a fast growing town like Kingston, proper sewage disposal is an ever increasing problem. Your Board of Health, endeavoring to keep abreast of this problem, has now adopted certain rules and regulations that should adequately take care of this situation for a number of years to come. These rules and regulations were effective December 13, 1936. Appended to this report are the new rules and regulations.

Reported diseases in 1936 included the following: Chicken Pox, German Measles, Measles and Dog Bites, a total of 56. This is an excellent record, the lowest in many years.

May we again ask the co-operation of our townspeople in trying to keep our town clean? Please dispose of all of your rubbish as frequently as possible. The town dump is open every day.

Regulations of the Board of Health of the Town of Kingston Statutory Authority

General Laws, Chapter 111, Section 31, (Ter. Ed.) as amended by Chapter 285 of the Acts of 1937, states:

"Boards of health may make reasonable health regulations. All regulations made by boards of health under this chapter shall be published once in a newspaper published in the town, and such publication shall be notice to all persons. Whoever, himself or by his servant or agent, or as the servant or agent of any other person or any firm or corporation, violates any reasonable health regulation, made under authority of this section, for which no penalty by way of fine or imprisonment, or both, is provided by law, shall be punished by a fine of not more than twenty dollars."

In addition, the legislature has delegated to the local boards of health of cities and towns the right to enact certain rules and regulations with certain penalties for violation thereof. (General Laws, Chapter 111, Sections 122, 127, 143 and 155.)

"Such rules and regulations" of local boards of health are, if properly enacted, penal laws, and complaints of violation thereof may be tried in the courts of the Commonwealth and convictions result as in the case of violation of any law. But if the rule or regulation be improperly drawn or passed it is void and cannot, of course, be enforced.

Cesspools, Septic Tanks, Vault Privies and Public Sewers

SECTION 1. The owner or other person or persons having control of any existing building or buildings hereafter erected or converted into a dwelling to be occupied by one or more families, and from which a public sewer is accessible, shall, in a manner and within a period of time satisfactory to the Board of Health, cause such building to be connected with such public sewer.

SECTION 2. The owner or other person or persons having control of any existing building or buildings hereafter erected or converted into one or more stores or other places of business, and in which one or more persons are employed, shall provide sufficient toilet facilities, and wherever a public sewer is accessible, shall, in a manner and within a period of time satisfactory to the Board of Health, cause such stores or other places of business to be connected with such public sewer.

SECTION 3. No sewage disposal works, the effluent from which will discharge into any lake, pond, stream, tidal waters, or any tributary thereof, shall be installed unless plans for such disposal works are first approved by the Massachusetts Department of Public Health.

SECTION 4. No cesspool, septic tank, permanent vault privy, or other means of sewage disposal, shall hereafter be constructed or installed in this town until a permit has first been obtained from the Board of Health.

SECTION 5. No dwelling place or other building shall be constructed until the Board of Health has approved the proposed lot as suitable from a sanitary point of view. No dwelling house on an unsewered street shall be constructed until a permit for a sewage disposal installation has first been obtained from the Board of Health.

SECTION 6. All sewage disposal works hereafter constructed or installed shall be of approved material and design and, unless otherwise specified by the Board of Health, shall be located not less than twenty (20) feet from any dwelling, not less than twenty-five (25) feet from any stream or piped drain, not less than ten (10) feet from line of any street, court or passageway, and not less than ten (10) feet from line of adjoining lot; all measurements being taken from the nearest portion of the sewage disposal works. Cesspools shall be provided with a safe, suitable, removable cover.

Overflow cesspools may be entirely covered with earth. The use of an abandoned well as a cesspool in areas where water supplies are obtained from the ground is hereby prohibited.

No sewage leaching works of less than 300 square feet of effective leaching area shall be installed. The Board of Health reserves the right to require a percolation test.

No garbage grinder shall hereafter be installed in unsewered areas without a permit from the Board of Health.

All septic tanks hereafter constructed shall be water tight and made of concrete, concrete block, brick or ± 14 gauge steel complying with U. S. Department of Commerce Commercial Standard 177-51.

The minimum effective capacity of septic tanks shall be determined from the following table:

No. of Bedrooms	Approximate Population	Liquid Capacity of Tank in Gallons*
2 or less	4	500
3	6	600
4	8	750
5	10	900
6	12	1,100
7	14	1,300
8	16	1,500

*Increase 50% when garbage grinder is used.

Any lot of less than one half acre shall be deemed to be too small for both water supply and sewage disposal on the same lot.

SECTION 7. The owner, person or agent responsible for the construction of local sewage disposal works shall have such construction inspected by the Board of Health or its agent before such construction is covered, and such covering shall thereafter be applied in a manner approved by the Board of Health.

SECTION 8. No permanent vault privy shall be constructed in this town without first obtaining written permission from the Board of Health.

Temporary vault privies for the convenience of persons engaged in construction work may be erected or installed with a permit, but only under the following conditions. The vault must be at least two feet in depth and must be so located as to cause no annoyance to persons residing in the vicinity. The person in charge of the premises shall cause the privy to be maintained in a sanitary manner, and immediately upon completion of the work, he shall remove the privy, shall fill in the vault and leave the premises in a condition satisfactory to the Board of Health.

SECTION 9. No indoor toilet or water closet, except that which is provided with proper means of flushing with water at time of using, where water is available, shall hereafter be installed on any premises in this town. Where water is not available for flushing, indoor chemical toilets of approved material and construction may be installed under special written permit of the Board of Health if proper provision is made for the final disposal of the contents thereof.

Section 10. Whenever a water closet, privy, septic tank, cesspool or drain becomes offensive or obstructed, the owner, agent or occupant of the premises shall cause same to be cleaned or otherwise corrected.

Section 11. Every owner, occupant, or agent of premises in which there is any private sewer, drain, vault privy, septic tank, or cesspool shall keep the same in a sanitary condition and shall have every vault privy, septic tank and cesspool emptied and cleaned when necessary or at such times as ordered by the Board of Health. No vault privy, septic tank or cesspool shall be emptied except by such parties and in such manner as shall be especially authorized by the Board of Health. If the owner or occupant fails to comply with such order, the Board may cause the nuisance, source of filth, or cause of sickness to be removed, and all expenses incurred thereby shall be paid by the person who caused or permitted same, if he has had actual notice from the Board of Health of the existence thereof.

Section 12. No sewage disposal works shall be established within 100 feet of any well used as a source of water supply.

Section 13. Should any section, paragraph, sentence, clause or phrase of these rules and regulations be declared unconstitutional or invalid for any reason, the remainder of said rules and regulations shall not be affected thereby.

Approved by the Board of Health at a regular meeting held on Tuesday, December 4, 1956, and to become effective Tuesday, December 18, 1956.

REPORT OF THE HIGHWAY DEPARTMENT

Several streets were sealed with applications of asphalt and sand. The bridge on West Street was replaced with a three-foot culvert and many other drainage problems throughout the town were also corrected. The entire length of River Street was rebuilt by widening and changing of grades. This should be of great assistance in the removal of snow, as this area has always been one of the major problems confronting us as a result of drifting snow.

At the annual town meeting in March, Page Avenue was accepted by the town. Early in the summer the road was rebuilt. This work consisted in the removal of two feet of clay which was replaced with gravel and an asphalt penetration.

The rip-rap on Wharf Lane was damaged by the severe winter storms. This was rebuilt and raised two feet.

Grove Street, which has always been of insufficient width, was widened as a temporary measure. However, further work will be necessary to properly correct the existing condition. When the new County layout of Grove Street becomes available, considerable work will be necessary to place this road, which is heavily travelled by school buses, in a safe condition.

The Chapter 90 Construction program consisted mainly of resurfacing Wapping Road from a point near the home of Prescott K. Bearce to West Street. The 1957 program should complete the remainder of Wapping Road.

The Chapter 90 Maintenance funds were used in resurfacing Elin Street.

Due to the severity of the winter, the sanding of the roads necessitated additional labor in the spring in cleaning the roads.

The bucket loader and truck for this department, which were purchased as a result of the affirmative vote by the townspeople at the 1956 annual meeting, have proven satisfactory.

Respectfully submitted,

G. PALMER HOLMES,
Superintendent of Streets.

REPORT OF THE PARK COMMISSION

The major activity for the year was the early preparation and continued care of Grays Beach Park for maximum use during the summer season. Sand was brought in to level the beach and to replace in part the cover lost in previous winter's storms. A concrete and paved ramp was built to enable boat owners easier access at all tides. A new float line was made and installed to mark the safe bathing areas, and new fireplaces were erected. The concession stand was leased for private operation and a park supervisor and a full-time life guard were engaged. The Town received parking fees from out-of-town visitors providing a total revenue of \$3,162.00.

Late in the season it became apparent the old cesspool had become inadequate for the increasing number of people using our bathing facilities. Other contemplated work was deferred in order that this necessary work could be undertaken. Work is now underway to provide a satisfactory sewage disposal facility which we hope will be adequate for many years.

The proposed budget for 1957 provides funds for the normal care and operation of all park properties, new fireplaces and benches at Grays Beach Park, and the further gradual improvement of all Veterans' memorial plots.

Respectfully submitted,

EARL C. PAULDING,
MALCOLM F. PETERSON,
HERBERT W. WEBER, *Chairman,*
Park Commission

WATER DEPARTMENT

To the Citizens of Kingston:

Your Water Commissioners have long held the view that a water department should look beyond its immediate horizons into the broader realm of the Town's progress.

With that in mind this Annual Report is a study of its objectives and its accomplishments.

The Elm Street pumping station was reshingled under the direction of the Silver Lake Vocational High School, for which we are grateful. Improved toilet facilities were provided, interior painting and a new ceiling was installed.

The Mill Gate Road pumping station and diesel engine were painted and necessary maintenance repairs were completed.

The interior of the South Street electric pumping station was painted.

During the year 49 new services were installed, making a total of 1,638 active water services that are now connected to our water system.

A survey and inspection of water fixtures was completed and will provide additional income to the Town.

Several test wells were installed under the direction of Whitman and Howard, Engineers, and as yet a suitable well location has not been found. In order to provide and maintain an adequate water supply that will enable us to have a margin of safety in order to keep ahead of the Town's growth and demand on our water system, for fire protection and home use we must continue on with this work; and we are therefore requesting additional funds this year for that purpose.

During 1957 it is expected that the projects voted in 1955 will be completed.

A great deal of credit for our accomplishments should be given to the voters of the Town for their wholehearted cooperation in providing your Water Department with the necessary

funds to carry out the ideals and objectives of your Water Commissioners.

Respectfully submitted,

EARL S. SAMPSON, Chairman,
RALPH F. SANTORO,
RICHARD W. LORING,

Board of Water Commissioners

REPORT OF THE SHELLFISH CONSTABLE

To the Honorable Board of Selectmen:

Your shellfish department made a seed test for clams with 1½ bushels on Ichabod's Flat during the month of April, according to specifications of the Department of Conservation, Division of Marine Fisheries. The results of this test proved that at the present time approximately 50% of the seed planted had survived. We recommend that another test of similar proportion be made next spring on another flat, with the planting of the seed in another manner.

The boundary lines were marked and also the grants.

It is noted that the Fishing Rocks Flat has a tremendous setting of natural quahog seed, which is growing fast.

A test was made in November by the Department of Conservation, Division of Marine Fisheries, on water pollution and the general condition of the Kingston Flats. This test period lasted for one week. It was suggested by the State chemists that some action be taken with regard to the increasing amount of Black Muscle on our flats. It is recommended that finances from the 1957 appropriation be used to destroy this condition.

Respectfully submitted,

ANTONE J. CAZALE,
Shellfish Constable

REPORT OF THE SCHOOL COMMITTEE

The problems of a growing community are most apparent in the school operation of that community. Within a short period of time we have seen our first grade class increase from a one room class to a three room class. This means that we soon must have a minimum of eighteen elementary classrooms in operation. In 1956 we used sixteen classrooms divided as follows -- twelve in the new elementary school and four on the ground floor of the old high school. Commencing September 1957 another room will be required and your committee has decided to reopen the Maple Avenue School for indefinite use.

The physical condition of the old high school continues to deteriorate despite our efforts to maintain this building by only effecting the most necessary repairs. We feel that the large expenditure required to make this building satisfactory would not be in the best interest of the town.

With a forward looking approach we have appointed a committee to continue the study of our school housing needs. You will recall that a previous committee appointed by the town in 1955 made its report at the 1956 March Town meeting. The members of the committee are Lawrence Bailey, Robert Jones, Mrs. Marshall Joyce, Mrs. Walter Kane and Baxter Moore.

A three year school bus contract was awarded to Car Lease Corporation of Brockton for the transportation of all Kingston public school children to our schools as well as to the Silver Lake Regional School. This operation began in September 1956 with the use of six new 60-passenger school buses containing many advanced safety features. The results to date have been very satisfactory to all concerned.

As in 1955, the private school transportation contract was awarded to the Sisters of Divine Providence to transport the Kingston children to the Sacred Heart School in Kingston.

The maintenance program at the Elementary School was started this year by painting the east-wing interior. A similar refinishing is planned for the west wing in 1957.

As a result of having two full time janitors at the Element-

tary School more time was available to improve the appearance of the grounds during 1956. We are pleased to report that a portion of the elementary playground was used during the summer months by the girls' softball league. Your committee continues to encourage the use of the school playground facilities by the townspeople providing it does not interfere with the school program.

The reopening of the Maple Avenue School will require a small expenditure for cleaning and minor repairs. Another teacher will be engaged to fill our seventeenth classroom in September 1957. The increased payroll plus an increment adjustment to the teaching staff and janitors will mean an increased budget for next year.

The 1957 Budget request together with 1956 expenditures plus the reports of our educational staff will be found on the following pages.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

Education Concerns the Whole Child

Our program today is much more complete at all grade levels. It is highly integrated as shown by our supervisory reports that follows. Work started in the elementary school is carefully coordinated with the advanced treatment in the secondary school. Definite progress has been made in all directions during the past several years. Much of this progress has been due to monthly principals' meetings.

The elementary art program is geared to embrace the principle that each child is a unique individual -- seeing, feeling and thinking as only he can, perfecting his ideas from his total experiences. Each lesson should encompass these suppositions so that the child's experiences will be enriched in the accumula-

tion of actual knowledge and enhanced by the acquisition of the joy of creating on his own level. By applying these objectives of the program, through stimulation, evaluation and appreciation in the classroom, the entire personality of the child will be satisfied.

In attempting to meet the goal of developing the whole child, the school must rise up to the challenges that the world outside offers. Reading is the best means because through this subject the pupil gains a tool with which to gather information. Reading gives him satisfaction and enjoyment, and a means of self expression.

Small group work, from the very beginning, helps children to learn by doing. They get ready to read by sharing common experiences. Grouping encourages one hundred per cent participation; this leads to the necessary repetition needed in learning. Thinking and oral discussion help to develop comprehension.

Books, pictures with captions, charts containing special vocabularies, stories, comprehension checks, picture dictionaries, number cards, the alphabet and identification cards on objects in the room are aids with which to guide pupils into purposeful learning activities.

Because the reading program is flexible, it can be readily adjusted to consider the individual needs of the pupils.

The aim of the physical education program has been to provide opportunities for the individual and the group to learn activities which are invigorating, fun to do, and will lead to positive physical, social, mental and emotional growth.

Each elementary classroom is serviced by the supervisor for a thirty-minute period every two weeks. The program consists of the following phases: directed play, small group play activity, large group play activity, basic team games and sports, elementary rhythmic activities, stunts, pyramids and apparatus activities, indoor and classroom games.

The junior-senior high school covers classwork for all pupils, both boys and girls. It is hoped that a complete intramural program will emerge in the years ahead. This, coupled with our school sports program, should give our schools an outstanding organization.

A school which meets every need of every child in its student body could be termed a completely comprehensive school. The Silver Lake Regional High School curriculum-wise approaches very closely this happy situation. The educational emphasis at Silver Lake remains constant in language arts, mathematics, and science. Terminal courses in the commercial field are offered in the academic high school and terminal courses in carpentry, agriculture, automotive mechanics, and home economics are offered in the vocational field.

Silver Lake Regional High School students are fortunate in having the opportunity to take a major in Art. Such a major enables students to select art in grades 9-12 to the extent that at least one hour each school day for four school years is devoted to the study and practice of art. Silver Lake Art majors have competed favorably in well-known collegiate-level art schools and it is anticipated that graduates of future years will be in an even better competitive position.

The science department at Silver Lake boasts four complete laboratories: General Science, Biology, Chemistry, and Physics. Many schools limit student experimentation and thereby deny pupils the pleasure and educational value gained by personal experience. Science facilities are student facilities at Silver Lake.

The Office Practice Work Experience Program for Senior Commercial Majors is unique at Silver Lake. Students enrolled in this course spend one marking period of eight weeks during the senior year in the office practice work experience room. They receive receptionist training, training in office procedures, routines, and responsibilities to self, co-workers, and employers. They are taught proper dress habits, how to converse on the telephone, how to clerk, and how to file. In order to pass the course, class members must learn the essentials of operating: the PBX telephone switchboard, the comptometer, the posting machine, the multilith, the audograph, addressograph, electric and manual liquid duplicators, adding machine, Vari-typer, and mimeograph. Practical experience in bookkeeping is supplied through the accounts of the many clubs and organizations which comprise the co-curricular activities of the school.

This year as in the past, the music program in your town

has been making a steady growth in order to keep up with the demands of the student body.

Vocal music, instrumental music, and music appreciation have been expanding in many ways to fulfill these needs. An elementary orchestra, comprising the four Towns of the School Union, will number some forty-two second-year students, this year, along with a fifty-piece concert High School Band. Violin instruction at the Junior High School level this year will speed the growth of an orchestra.

An all male glee club has been formed at the request of a large number of High School Boys. Three other High School choruses along with elementary vocal ensembles and music appreciation complete the music program in our Town and High School, this year.

Silver Lake Regional Vocational School

The Vocational Department has four divisions -- Carpentry and Millwork, Automotive Mechanics, Agriculture and Household Arts. These divisions are further divided into Trade and Industrial shops -- i.e., Carpentry and Automotive, and the high school departments, i.e., Agriculture and Household Arts.

Trade and Industrial are those classes which are operated independently from the regular high school. They have a separate bell schedule and a different daily routine. One full week is in shop; the second week is in related and academic classwork.

Carpentry and Millwork takes the boys out to the job on actual buildings in towns in the district. Our first major project was a garage and breezeway in Halifax which was started last April and finished early this fall. Since then the department has completed several town projects in Halifax, Pembroke and Kingston.

Automotive Mechanics covers all phases of automobile repair. The training sequence goes from simple machine shop practice through the mechanical functions, to the electrical system. Emphasis is placed on proper shop attitudes, good shop procedures, and a sense of responsibility. Work is done on "live" cars, acceptance of which is dependent on the use that can be made of the job in the learning process.

Vocational Agriculture, being a high school department, schedules its academic classes with the regular high school. The rest of the day is spent in the agricultural classroom and shop. All of the farm project work is done on the farms of the students or their employers. Farm machinery from these and other farms become excellent shop projects.

Vocational Household Arts is another high school department where the girls spend two periods a day in the vocational laboratory and the rest of the day in regular classes. This course is intended for girls in grades 9 and 10 but has been opened for some upper class girls. Projects here include cooking and service at special school affairs, and sewing and decorating for special areas or special events. Each girl must carry out an approved home project under the supervision of the instructor.

We have presented a brief preview of many areas of our school work. As you realize, many other facets exist. Our schools are carrying on programs for educationally retarded pupils. They are providing a complete health service with annual examinations by school physicians. A registered nurse is available for check-up work and daily health problems. Constant effort is being made to better our work in all directions. Above all, we are concerned with the "three R's," as well as the other subject areas that make up the total educational program.

May I express my sincere appreciation for their helpful cooperation in advancing our school program to the school committee, the school building committee, town officials, staff members, the P.T.A. and other civic organizations. It is only with this continued cooperation that our schools can maintain their place in our community life.

Respectfully submitted,

CHESTER T. RAY,

Superintendent of Schools.

ANNUAL REPORT OF THE SILVER LAKE REGIONAL SCHOOL COMMITTEE

It seems that our program undertaken with such high hopes six years ago is now in smooth operation.

At our organizational meeting in the Spring, we saw our first Committee change. Mr. Richard K. Baltzer of Pembroke replaced Mr. George K. Gillette, Jr., who has served the district faithfully since its beginning. The Committee and the district owe Mr. Gillette a debt of gratitude for his many years of un-

selfish service to the youth of our towns. June brought our first commencement and we wish to commend the Faculty Commencement Committee for a well planned program, the weather notwithstanding. The Fall term found us under way with a full staff of teachers although the change in personnel was greater than had been expected. With a sub-committee to study personnel problems and improvements in the salary schedule included in the 1957 budget, it is hoped that teacher replacement will be considerably lessened in 1957.

The Vocational School is bearing out all the hopes of those who planned it. During the past year we have added Adult Education to our vocational program and the response has been most enthusiastic. Registrations have levelled off in this last fall registration and we expect a more normal demand next year. Driver Education has shown unusual growth and it may be necessary to separate it from the regular school program in years to come.

The financial report of the school operation is included as a part of this report. A complete report on the final settlement with the School Building Assistance Commission is in process and will be included in the 1957 report.

We have passed the "getting started" stage of our new school operation. Many lessons have been learned and applied. 1957 should be a very good year at Silver Lake.

REPORT OF STATE AUDITOR

January 22, 1957

Silver Lake Regional District School Committee
Kingston, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the books and accounts of the Silver Lake Regional School District for the period from December 18, 1955, to December 24, 1956, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. William Schwartz, Assistant Director of Accounts.

Very truly yours,

HERMAN B. DINE,
Director of Accounts.

Mr. Herman B. Dine
Director of Accounts
Department of Corporations and Taxation
State House, Boston

Sir:

In accordance with your instructions, I have made an audit of the books and accounts of the Silver Lake Regional School District for the period from December 18, 1955, the date of the previous audit, to December 24, 1956, and report thereon as follows:

The records of financial transactions were examined and proved with the records of the accounting officer.

The accounting officer's ledgers were analyzed. The receipts were checked with the district treasurer's books, the payments were checked with the treasurer's records of payments, and the appropriations were checked with the district secretary's records of meetings. A trial balance was taken off, proving the accounts to be in balance, and a balance sheet, which is appended to this report, was prepared showing the financial condition of the district on December 24, 1956.

The books and accounts of the district treasurer were ex-

amined and checked. The recorded receipts were analyzed and proved, while the payments were compared with the approved warrants on file. The cash book additions were proved and the cash balance on December 24, 1956, was verified by reconciliation of the bank balances with statements received from the depositories.

The payments made for maturing debt and interest were verified with the amounts falling due and with the cancelled securities and coupons on file.

The records of the assessments on member towns to provide for operating and construction expenses of the district, together with the records of charges for tuition and rentals, were examined, and the payments to the treasurer were verified.

The records of employees' payroll deductions for Federal taxes and the county retirement system were examined and reconciled with the controlling ledger accounts.

The records of the revolving funds for school lunches and athletic activities were examined, and the payments to the district treasurer were verified.

Appended to this report, in addition to the balance sheet, are tables showing a reconciliation of the treasurer's cash and summaries of the assessment, tuition, and rental accounts, and of the lunch and athletic programs.

On behalf of my assistants and for myself, I wish to express appreciation for the cooperation received from the district officials while engaged in making the audit.

Respectfully submitted,

WILLIAM SCHWARTZ.

REPORT OF STATE AUDITOR

February 4, 1957

To the Board of Selectmen
Mr. John J. Moore, Chairman
Kingston, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the books and accounts of the town of Kingston for the period from December 18, 1955, to December 24, 1956, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. William Schwartz, Assistant Director of Accounts.

Very truly yours,

HERMAN B. DINE,
Director of Accounts.

Mr. Herman B. Dine
Director of Accounts
Department of Corporations and Taxation
State House, Boston

Sir:

In accordance with your instructions, I have made an audit of the books and accounts of the town of Kingston for the period from December 18, 1955, the date of the previous audit, to December 24, 1956, the following report being submitted thereon:

The financial transactions, as recorded on the books of the several departments receiving or disbursing money for the town or committing bills for collection, were examined, checked, and verified by comparison with the books of the town accountant and the treasurer.

The books and accounts in the office of the town accountant were examined and checked. The receipts, as recorded, were checked with the records of the departments making payments to the treasurer and with the treasurer's books, while the payments were checked with the treasury warrants signed by the selectmen and with the treasurer's cash book. The appropriations and transfers were checked with the town clerk's records

of town meetings and with the authorizations of the finance committee for transfers from the reserve fund.

The town accountant's ledgers were analyzed, and a balance sheet, which is appended to this report, was prepared showing the financial condition of the town on December 24, 1956.

The books and accounts of the town treasurer were examined and checked. The recorded receipts were compared with the several departmental records of payments to the treasurer with other sources from which the town received money, and with the town accountant's books. The recorded payments were checked with the approved warrants authorizing the disbursement of town funds and with the accountant's books. The cash balance on December 24, 1956, was proved by actual count of the cash in the office and by reconciliation of the bank balances with statements received from the banks of deposit.

The payments made on account of maturing debt and interest were compared with the amounts falling due and with the cancelled securities on file.

The savings bank books and securities representing the investments of the trust and investment funds in the custody of the town treasurer and the trustees were examined and listed. The income was proved, and all expenditures and transfers to the town were verified.

The records of tax titles and tax possessions held by the town were examined. The taxes transferred to the tax title account were compared with the collector's records, the reported redemptions and sales of tax possessions were checked with the treasurer's cash book, and the tax titles and tax possessions on hand were listed and reconciled with the accountant's ledger.

The records of employees' payroll deductions on account of Federal taxes, and of retirement system, Blue Cross and Blue Shield, and group insurance memberships were examined and checked, the payments to the proper agencies being verified.

The books and accounts of the town collector were examined and checked in detail. The taxes, motor vehicle and trailer excise, departmental, and water accounts outstanding according to the previous examination, as well as all subsequent commitments,

were audited and proved. The collections, as posted to the commitment books, were compared with the cash book entries and with the payments to the treasurer as shown by the treasurer's cash book. The abatements as entered were checked with the records in the departments authorized to grant such credits, and the outstanding accounts were listed and reconciled with the controlling accounts in the town accountant's ledger.

Verification of the correctness of the outstanding accounts was obtained by mailing notices to a number of persons whose names appeared on the books as owing money to the town, the replies received thereto indicating that the accounts, as listed, are correct.

The town clerk's records of dog and sporting licenses issued and of miscellaneous receipts were examined and checked, the payments to the State being verified by comparison with the receipts on file and the payments to the town being checked with the treasurer's cash book.

The records of all other departments collecting money for the town or committing bills for collection were examined and reconciled with the town treasurer's receipts and with the accountant's records.

The surety bonds of the town officials required by law to file them for the faithful performance of their duties were examined and found to be in proper form.

Appended to this report, in addition to the balance sheet, are tables showing a reconciliation of the treasurer's cash, summaries of the tax, motor vehicle and trailer excise, tax title, tax possession, departmental, and water accounts, together with schedules showing the condition and transactions of the trust and investment funds.

During the progress of the audit cooperation was extended by all town officials, for which, on behalf of my assistants and for myself, I wish to express appreciation.

Respectfully submitted,

WILLIAM SCHWARTZ,
Assistant Director of Accounts.

TOWN OF KINGSTON

MASSACHUSETTS

Report and Recommendations

OF THE

FINANCE COMMITTEE

TO THE

Annual Town Meeting, 1957

**Together with a Copy of the Warrant Articles
and Accompanying Recommendations**

REPORT AND RECOMMENDATIONS OF THE FINANCE COMMITTEE

To the Citizens of Kingston:

Your Finance Committee presents the following report and recommendations for action at the annual town meeting.

After careful study of all budgets we were able to reduce the requested amounts for operation of the town by approximately \$10,000.00. We have tried to be fair and treat each department equitably.

The warrant articles we have recommended call for an expenditure of about \$38,000.00. We have studied the articles as thoroughly as possible with the information available to us. It is our belief a better understanding might have been achieved if those who petitioned for certain articles had appeared before this committee with an explanation of their reasons for submitting their petitions. It is recommended that in the future all petitioners contact the Finance Committee to explain the reasons for their requests.

It is our earnest belief that as the majority of the town's operating budget is expended on schools, the townspeople should more thoroughly familiarize themselves on school operations. Therefore, a committee of two of our members was designated to study the operations of the Silver Lake Regional School in order that your Finance Committee would be better informed as to whether or not the town is receiving full value for the money spent on this school.

The town employees have requested and we have recommended a wage increase for all departments. We feel that the employees are responsible for the successful operation of our town and have contributed to the good financial condition it is in, which is a marked improvement over that of 1955.

The use of free cash is recommended to retain our present tax rate, as we feel the town's finances can withstand such a procedure.

We wish to thank all departments and committees for

their cooperation during the past year. We have been provided with all the information needed and asked for. As a result we are able to give the citizens of the town a fair and honest opinion of the various budgets and articles submitted to us for our recommendations.

Respectfully submitted,

LAWRENCE B. WESTGATE, *Chairman*,
 JOHN R. HAMILTON, *Vice Chairman*,
 MATTHEW C. WALSH, JR., *Secretary*,
 ALF C. LOOTZ,
 RENATO ZOCCOLANTE,
 GUSTAVO GUIDOBONI,
 MARSHALL W. JOYCE,
 HAROLD S. NATHANSON,
 HENRY LEMIEUX,
